

GONZALO DIEZ

**DATA ANALYST - INGENIERO QUÍMICO -
LEAN SIX SIGMA GREEN BELT**

As well as having deep analytical thinking I put a great emphasis on communication, so I am always trying to integrate data technology in the decision making process. I feel highly motivated in environments where ideas are encouraged and I can have a sense of freedom while having fun. Also, I am extremely curious for new ways to solving problems and learning new skills.
